

To our valued clients,

At Alta our mission is simple. CREATE VALUE, BUILD TRUST AND DELIVER RESULTS.

We are focused on bringing you a solution for your operation whilst ensuring you are well supported with advice and assistance from your local Alta Beef Advisors. We are dedicated to helping you make decisions that meet your needs with skilled Alta people in beef reproduction as well as skilled Alta people in the beef breeding business.

In recent times we've had great success with our existing breeder sires in Baldridge 38 Special, Ellingson Three Rivers, and the high fertility sire Woodhill Patent. We are pleased to be able offer these proven sires again this year as well as some new additions to the Alta Program in Connealy Reformer, BA7 Oaks Bold Ruler, a Connealy Confidence Plus son from a highly touted Baldridge 38 Special daughter & Ellingson Deep River the moderate birthweight Three Rivers son.

Our Australian standing sire highlights including Bellaspur Platinum P46 & Stellar Quicksliver Q7, a pair of bulls that can really offer the market proven pedigrees with proven performance.

We provide a cross section of bulls across breeds from Angus through to Wagyu and everything in between. Along with our range of genetics and breeds, we also provide experienced advice on how to get the most out of your program, creating more pregnancies, more live calves, more end value to your beef business.

If you would like to hear first about new sire releases, beef updates and the locations our beef team will be traveling to throughout the year, please sign up to our beef newsletter & follow along on our social media.

We look forward to seeing and hearing from you throughout the season. If there are any questions on any of the sires we have available, not only in Australia but worldwide please reach out to us at anytime.

Happy Breeding!

Your Alta Beef Team

"Wrangler was a standout the year we sold him. Everyone who saw him that year saw he was a real rugged made bull, a lot of middle, super sound made, and we have some really good daughters in the herd now. They are easy fleshing, shed out well, with good udders and they are fertile. Progeny are well made, with a big hip, and are long bodied. We think Wrangler can help a lot of breeders as he can add a lot of bone & structure."

BALDRIDGE 38 SPECIAL PROGENY IN AUSTRALIA

"38 Special has proven to be one of the most outstanding bulls we have used in recent years. In the avalanche of Isabel Y96 descendants that have recently flooded in from the US he has given us the most bang for our buck of all we have sampled. His sons are quiet, structurally well put together, whilst provide calving ease without sacrificing growth and muscle. His daughters have risen to the top of our herd on the back of their excellent phenotype and paperwork with a number finding their way into the nucleus of our herd."

Simon Falkiner; Murdeduke Angus

Murdeduke 38 Special S393

Alumy Creek 38 Special S092

"We inspected Baldridge 38 Special in the US back in 2016 and we have been very happy with how he has worked in our herd. 38 Special has brought the added bonus of Isabel Y69 maternal magic into our cow herd with easy keeping daughters and granddaughters that really perform to add kilos & quality into his calves.

38 Special has produced thick, deep bodied, easy doing well muscled sons for us that have been real commercial producer favourites for his balance of calving ease and progeny performance. 38 Special may bring a touch more frame and length to his progeny and they are very profitable commercially relevant cattle for the Australian industry. We are not at all surprised to see the impact & popularity Baldridge 38 Special sons are having around the country."

Colin Keevers and Dr Lisa Martin BVSc Alumy Creek Angus, Tenterfield

"38 Special was researched and selected for Al use due to his balance of Calving Ease, Explosive Growth, Moderate MCW, High EMA and favourable foot data. His progeny are cut from the same mould. 38 Special calves are easily born, grow like steam, good footed and are particularly well muscled."

Ben Glatz Glatz Black Angus

Glatz Black Angus 38 Special R32

"We continue to be impressed by the 38 Special progeny at 3R. To mind he is the Y69 son that best covers all the bases. His progeny perform well, are structurally sound and all with such an attractive phenotype. When I think about the requirements of the commercial Cattleman 38 Special would be one of those rare bulls that you could blanket mate to with absolute confidence."

Geoff Birchnell - 3R Livestock; Loomberah, NSW

What is Akaushi?

Akaushi is known as the "Emperor's Breed." All Akaushi are Wagyu, but not all Wagyu are Akaushi. The Akaushi breed did not exist outside of Japan until the 1990s. Akaushi cattle are known worldwide for their distinct marbling that gives Akaushi beef a melt-in-your-mouth texture and rich, buttery flavor.

How did this premium Japanese beef breed come to Aust and the US? Akaushi cattle are almost entirely derived from the original fullblood Akaushi herd imported to the U.S. in 1994.

Since then, Akaushi genetics have increased carcass performance and premium grade opportunities for cattle producers throughout the country.

While Akaushi beef is prized for its marbling and intense flavour, Akaushi cattle boast extremely efficient, consistent production. They excel at important traits, like growth, fertility, vigor and longevity. The Akaushi breed offers one-of-a-kind opportunities to improve consistency, maintain uniformity and help maximize the gap between profit and loss in your herd.

BREED BENEFITS

Looking for a new alternative in your breeding. Want higher cattle prices?

Next breeding season consider Akaushi genetics for your herd. This breed consistently produces high quality carcasses for increased profitability. Recent carcass data shows Akaushi cattle grade an average of 51.4% Prime and 47.4% Choice, in US feed systems which is key to driving Akaushi beef demand with consumers.

Beef producers prize these traits in their Akaushi herds:

BULL LONGEVITY

Akaushi bulls typically last 10+ years and often double the quality grade and minimize yield grade 4s and 5s

COW LONG EVITY

Akaushi average 8 years of calving and are known for their high fertility, calving ease and quality udders, feet and legs

CALVING EASE

More live calves on the ground, less calf mortality

ENVIRONMENTAL ADAPTABILITY

The Akaushi breed is successful across all climates, including cold, heat, high altitude, etc.

HEALTH AND TASTE

The high-fat content in Akaushi cattle leaves less room for muscle fiber and collagen, making the beef notably more tender than other breeds. It also contains a higher concentration of monounsaturated fat relative to saturated fat, which the American Heart Association notes can lead to lower cholesterol, the prevention of coronary heart disease and weight loss.

In addition, the high amount of oleic acid found in Akaushi beef gives it a deep, buttery taste, unlike any other beef on the American market. It provides a truly unique eating experience with a melt-in-your-mouth texture.
